Overview

Agenda

- **Start File**

- **Connect the jQuery**

- **Style the Phone**

- **Style the Tablet and Desktop**

jQuery Explained

```javascript
$(function() {

    // Create the dropdown base
    $("<select />").appendTo("nav");

    // Create default option "Go to..."
    $("<option />", {
        "selected": "selected",
        "value"   : "",
        "text"    : "Go to..."
    }).appendTo("nav select");

    // Populate dropdown with menu items
    $("nav a").each(function() {
      var el = $(this);
      $("<option />", {
          "value"   : el.attr("href"),
          "text"    : el.text()
      }).appendTo("nav select");
    });

    // To make dropdown actually work
    $("nav select").change(function() {
      window.location = $(this).find("option:selected").val();
    });

});
```
